DISALVO
LAKE HOUSE
DOOR COUNTY
WISCONSIN

Blackstone Instructions

1. Slowly open the gas valve on propane tank.
2. Light the left burner first by holding down the ignition button and turning the left burner switch. Be patient and make sure the back of the griddle is out of the direct wind.
3. If the ignition switch does not work, use a long stick lighter to manually light the left burner.
4. Once left burner is lit, go sequentially to the right lighting each burner next.
5. Let it heat up, and use some canola oil that should be in one of the squirt bottles.
6. Once you are ready to cook, turn the heat to medium as to not burn what you are cooking.
7. When you are finished, please DO NOT USE SOAP to clean it, as the griddle is cast iron.
8. Simply use the water in a squirt bottle provided and the spatula to clean it while hot and scrape excess into the drip pan in back.
9. Additional drip pans are underneath the grill.
10. All utensils for the Blackstone Griddle are in a container that should be kept together in cabinet under clock in kitchen. When done, please clean and put all items back for the next guest.
